

BETTER HOMES, BETTER PLANET

Together we
can help create a
climate-resilient
Oak Park.

SOLAR POWER can be harnessed through panels on your house or through a community solar subscription for cheaper, cleaner, carbon-free electricity.

ENERGY ASSESSMENTS identify areas in your home where you can save money through energy-efficient appliances or practices.

WEATHERIZATION refers to sealing your home's windows, walls, and doors to prevent energy loss through cooling or heating costs.

ENERGY GRANTS are available through the Village of Oak Park to help cover the cost of solar panels, energy upgrades, efficient appliances, and more.

SIGN UP TODAY!

It takes less than five minutes to find the right programs to help you fight climate change, save money, and have a more comfortable home. Oak Park's Sustainability Office is available to help you sign up today.
